

Secure IT Services. Peace of mind for your practice.

Cybersecurity attacks are on the rise, and practices are in the line of fire.

Can you afford for your devices or network to go down, or a security breach? Consider the impact on patient care if your systems are down due to an IT issue or cybersecurity attack. Secure Solutions Now delivers secure IT management services right sized for your practice. Our IT and security specialists not only help with managing your IT needs but ensure your clinic is protected from security hacks and data breaches.

We deliver a complete IT services solution including:

IT Support

24/7 Proactive Network Monitoring
and Management

Data Backup

EMR Transition
and Support

Advanced Cybersecurity
Protection

Cybersecurity
User Training

Comprehensive IT and security services designed for clinics and managed by industry experts.

Request an IT audit!

Are your devices up to date? Is your network protected? Does your staff know how to keep your patient information safe? We can audit and assess your clinic and help you minimize the risk of downtime and security issues.
